Professional Summary

Quality Engineer with 5 years of experience spanning full QA lifecycle ownership — test planning, test design, test execution, and test management — across HRMS, compliance, and fintech/investment platforms. Leads validation of migrated data and integrations, coordinates UAT sessions, and reports results to stakeholders through automated alerts and documented RTMs. Strong in SQL/MySQL database testing and REST API validation, with hands-on automation (Playwright, Selenium) that turns manual test cycles into reliable regression coverage. Comfortable working in hybrid/remote environments with cross-functional teams and business partners.

Technical Skills

- **QA Methodology & Tools:** Test Planning, Test Design, Test Execution, Test Management, UAT Coordination, Requirement Traceability Matrix (RTM), Defect Lifecycle Management (JIRA)
 - **Databases & Data Validation:** MySQL Database Testing, Data Validation for Migrated Portals, SQL Querying
 - **API Testing:** REST API Testing (Postman), Authentication/Authorization Validation, CRUD & Data Validation
 - **Test Automation:** Selenium WebDriver, Playwright, TestNG, Page Object Model (POM), Maven
 - **Reporting & Metrics:** Allure Reporting, Automated Pass/Fail Alerts (JIRA/Slack), Test Result Summarization
 - **CI/CD & Tools:** GitHub Actions, Git, GitHub, Agile/Scrum
 - **Domain Knowledge:** HRMS, Compliance Portals, Fintech/Investment Platforms, AI-Powered Applications
-

Professional Experience

SDET / AI QA Automation Engineer | Sphinx Worldbiz Ltd. — October 2021 – Present

HMEL ISO Compliance & STAR Portals (SharePoint Online) | Feb 2026 – Present | Playwright · TypeScript · GitHub Actions · Allure · RAG · n8n · Gen AI

- Led UAT sessions validating migrated data and integrations, obtaining sign-off on compliance portal releases.
- Built a RAG pipeline to query compliance documentation, improving test case traceability and cutting manual lookup time.
- Designed n8n workflows to trigger nightly regression runs and route Allure pass/fail results to JIRA and Slack, keeping stakeholders informed of sign-off status.
- Developed structured test scenarios and RTMs for service-request workflows, including multi-level approvals, producing 150+ reusable test scripts.

HMEL In-House Portal Migration & Testing (Client Site) | Mar 2025 – Jan 2026 | Playwright · TypeScript · GitHub Actions · Allure · n8n · Gen AI/LLM

- Led validation of 60+ migrated SharePoint portals with zero production defects, coordinating sign-off status reporting via JIRA and email.
- Maintained 95% automation coverage using LLM-powered flaky-test analysis, and created test scenarios and RTMs with Generative AI.
- Performed data validation across migrated portals, verifying data integrity and integrations.

Nature Alpha — Biodiversity Investment Platform | Dec 2024 – Mar 2025 | JMeter · REST API · JIRA · GitHub · Gen AI (ChatGPT)

- Developed structured test plans and cases aligned with business requirements, using ChatGPT to accelerate test-plan drafting.
- Documented and tracked defects in JIRA through full resolution lifecycle, collaborating with cross-functional Agile teams.
- Executed performance and load testing with JMeter to assess system behavior under varied traffic conditions.

Contractor Safety Management Portal | Oct 2024 – Dec 2024 | Selenium · Java · TestNG · Maven · JIRA · REST API · GitHub

- Implemented a Maven/TestNG automation framework for continuous testing of safety compliance modules.
- Designed and executed automated tests for contractor onboarding, work permit issuance, and safety violation handling.
- Performed end-to-end functional testing and managed the defect lifecycle in JIRA.

Dream Collector — AI-Powered Goal Achievement Platform | Feb 2024 – Sep 2024 | LLM Integration Testing · Mobile Testing · JIRA · Gen AI (Copilot)

- Executed functional, integration, and regression testing for OTP authentication and user profile management.
- Validated user stories in JIRA against acceptance criteria defined in BRD and FRD documents.
- Developed automated test cases for AI-driven features powered by Llama 2 LLM integration.

SHRM Pro — Human Resource Management System (HRMS) | Oct 2021 – Feb 2024 | Selenium · Java · REST API · Postman · Maven · JIRA

- Built a REST API testing framework in Postman covering authentication, authorization, CRUD operations, and data validation.
- Automated end-to-end workflows for employee data, payroll, and benefits administration modules.
- Developed automated UI tests with Selenium/Java and POM, aided by AI code generation.

Key Achievements

- Migrated and validated 60+ SharePoint portals with zero production defects.
- Sustained 95% automation coverage across enterprise applications through AI-assisted test maintenance.
- Built reusable automation frameworks from scratch, improving overall team productivity by 50%.
- Cut test-documentation effort by 40% through Gen AI adoption for test cases and RTMs.

Education

Bachelor of Engineering (B.E.) — Rajiv Gandhi Technical University (RGTU), Bhopal, M.P., India
