Professional Summary

QA Automation Engineer / SDET with 5 years of experience delivering measurable quality outcomes: 95% sustained automation coverage, 70% reduction in regression testing time, and 50% team productivity gains through reusable, AI-enhanced frameworks. Hands-on architect of end-to-end automation ecosystems spanning Selenium, Playwright, Java, and TypeScript, integrated with GitHub Actions CI/CD and Allure reporting. Equally comfortable designing frameworks, reviewing code with developers, and mentoring QE teammates on automation best practices in agile environments.

Core Impact

- Cut regression testing time by **70%** by integrating Playwright/TypeScript suites into GitHub Actions nightly CI/CD runs.
 - Sustained **95%** automation coverage across enterprise applications through LLM-powered flaky-test analysis.
 - Improved team productivity by **50%** by building reusable automation frameworks from scratch.
 - Cut test-documentation effort by **40%** by adopting Gen AI (Claude Code, Copilot) for test case generation and RTMs.
 - Migrated and validated **60+** SharePoint portals with **zero production defects**.
-

Technical Skills

- **Test Automation Frameworks:** Selenium WebDriver, Playwright, Playwright MCP, TestNG, Page Object Model (POM)
 - **Programming Languages:** Core Java, TypeScript
 - **CI/CD & DevOps:** GitHub Actions, CI/CD Pipeline Integration, Automated Nightly Regression, Allure Reporting
 - **API & Performance Testing:** REST API Testing (Postman), JMeter Performance & Load Testing
 - **Databases & SQL:** MySQL Database Testing
 - **Web Technologies:** SharePoint Online (Microsoft 365), REST APIs
 - **Methodologies:** Agile/Scrum, Sprint Planning, Code Reviews, Requirement Traceability Matrix (RTM)
-

Professional Experience

SDET / AI QA Automation Engineer | Sphinx Worldbiz Ltd. — October 2021 – Present

HMEL ISO Compliance & STAR Portals (SharePoint Online) | Feb 2026 – Present | Playwright · TypeScript · GitHub Actions · Allure · RAG · n8n · Gen AI

- Built Playwright/TypeScript end-to-end automation for service-request workflows, including multi-level approvals, using POM to produce 150+ reusable test scripts.
- Integrated the test suite into GitHub Actions CI/CD for automated nightly regression, cutting manual testing effort by 70%.
- Designed n8n workflows to trigger nightly regression runs and route Allure pass/fail results to JIRA and Slack, keeping stakeholders informed.
- Leveraged Claude and ChatGPT for test case generation and locator optimization; led UAT sessions validating migrated data and integrations.

HMEL In-House Portal Migration & Testing (Client Site) | Mar 2025 – Jan 2026 | Playwright · TypeScript · GitHub Actions · Allure · n8n · Gen AI/LLM

- Maintained 95% automation coverage using LLM-powered flaky-test analysis across 60+ migrated SharePoint portals.

- Built and optimized Playwright/TypeScript automation suites for 60+ portals, using ChatGPT and Claude to accelerate script generation.
- Used n8n to automate migration validation across 60+ portals and notify stakeholders of sign-off status via JIRA and email.
- Designed scalable, AI-assisted automation frameworks enabling parallel execution and maintainable architecture.

Nature Alpha — Biodiversity Investment Platform | Dec 2024 – Mar 2025 | JMeter · REST API · JIRA · GitHub · Gen AI (ChatGPT)

- Executed performance and load testing with JMeter to assess system behavior under varied traffic conditions.
- Documented and tracked defects in JIRA through full resolution lifecycle, collaborating with cross-functional Agile teams.

Contractor Safety Management Portal | Oct 2024 – Dec 2024 | Selenium · Java · TestNG · Maven · JIRA · REST API · GitHub

- Implemented a Maven/TestNG automation framework for continuous testing of safety compliance modules.
- Designed and executed automated tests for contractor onboarding, work permit issuance, and safety violation handling.

Dream Collector — AI-Powered Goal Achievement Platform | Feb 2024 – Sep 2024 | LLM Integration Testing · Mobile Testing · JIRA · Gen AI (Copilot)

- Developed automated test cases for AI-driven features powered by Llama 2 LLM integration, validating AI-generated content.
- Executed functional, integration, and regression testing for OTP authentication and user profile management.

SHRM Pro — Human Resource Management System (HRMS) | Oct 2021 – Feb 2024 | Selenium · Java · REST API · Postman · Maven · JIRA

- Automated end-to-end workflows for employee data, payroll, and benefits administration modules with Selenium/Java and POM.
- Built a REST API testing framework in Postman covering authentication, authorization, CRUD operations, and data validation.

Education

Bachelor of Engineering (B.E.) — Rajiv Gandhi Technical University (RGTU), Bhopal, M.P., India
