Professional Summary

Sr Software Test Engineer / SDET with 5 years of experience contributing to software delivery within agile teams, championing quality assurance across products and services, and mentoring teammates in QA techniques. Proficient in Java and TypeScript with strong SQL skills for database querying and validation. Expert in Agile methodologies, version control with Git/GitHub, and CI/CD pipeline integration. Builds scalable automation frameworks (Selenium, Playwright, TestNG) that translate complex business requirements into practical, maintainable test solutions.

Technical Skills

- **Programming Languages:** Core Java, TypeScript
- **Automation & Testing:** Selenium WebDriver, Playwright, Playwright MCP, TestNG, Page Object Model (POM), Maven
- **Databases:** SQL Querying, MySQL Database Testing, Data Validation
- **API Testing:** REST API Testing (Postman)
- **Version Control & CI/CD:** Git, GitHub, GitHub Actions, CI/CD Pipeline Integration, Automated Nightly Regression, Allure Reporting
- **Methodologies:** Agile/Scrum, Sprint Planning, Code Reviews, Requirement Traceability Matrix (RTM)
- **Performance Testing:** JMeter Performance & Load Testing
- **Domain Knowledge:** HRMS, Compliance Portals, Fintech/Investment Platforms, AI-Powered Applications

Professional Experience

SDET / AI QA Automation Engineer | Sphinx Worldbiz Ltd. — October 2021 – Present

HMEL ISO Compliance & STAR Portals (SharePoint Online) | Feb 2026 – Present | Playwright · TypeScript · GitHub Actions · Allure · RAG · n8n · Gen AI

- Built Playwright/TypeScript end-to-end automation for service-request workflows, including multi-level approvals, using POM to produce 150+ reusable test scripts.
- Integrated the test suite into GitHub Actions CI/CD for automated nightly regression, cutting manual testing effort by 70%.
- Led UAT sessions validating migrated data and integrations, collaborating with product and technical stakeholders.
- Leveraged Claude and ChatGPT for test case generation, documentation, and locator optimization.

HMEL In-House Portal Migration & Testing (Client Site) | Mar 2025 – Jan 2026 | Playwright · TypeScript · GitHub Actions · Allure · n8n · Gen AI/LLM

- Built and optimized Playwright/TypeScript automation suites for 60+ migrated SharePoint portals, using ChatGPT and Claude to accelerate script generation.
- Maintained 95% automation coverage using LLM-powered flaky-test analysis, and created test scenarios and RTMs with Generative AI.
- Designed scalable, AI-assisted automation frameworks enabling parallel execution and maintainable architecture.
- Used n8n to automate migration validation across 60+ portals and notify stakeholders of sign-off status via JIRA and email.

Nature Alpha — Biodiversity Investment Platform | Dec 2024 – Mar 2025 | JMeter · REST API · JIRA · GitHub · Gen AI (ChatGPT)

- Executed performance and load testing with JMeter to assess system behavior under varied traffic conditions.
- Developed structured test plans and cases aligned with business requirements, using ChatGPT to accelerate test-plan drafting.

- Documented and tracked defects in JIRA through full resolution lifecycle, collaborating with cross-functional Agile teams.

Contractor Safety Management Portal | Oct 2024 – Dec 2024 | Selenium · Java · TestNG · Maven · JIRA · REST API · GitHub

- Implemented a Maven/TestNG automation framework in Java for continuous testing of safety compliance modules.
- Designed and executed automated tests for contractor onboarding, work permit issuance, and safety violation handling.
- Performed end-to-end functional testing and managed the defect lifecycle in JIRA.

Dream Collector — AI-Powered Goal Achievement Platform | Feb 2024 – Sep 2024 | LLM Integration Testing · Mobile Testing · JIRA · Gen AI (Copilot)

- Developed automated test cases for AI-driven features powered by Llama 2 LLM integration, validating AI-generated content.
- Executed functional, integration, and regression testing for OTP authentication and user profile management.
- Validated user stories in JIRA against acceptance criteria defined in BRD and FRD documents.

SHRM Pro — Human Resource Management System (HRMS) | Oct 2021 – Feb 2024 | Selenium · Java · REST API · Postman · Maven · JIRA

- Developed automated UI tests with Selenium/Java and POM, aided by AI code generation.
- Built a REST API testing framework in Postman covering authentication, authorization, CRUD operations, and data validation.
- Automated end-to-end workflows for employee data, payroll, and benefits administration modules.
- Used Langflow to prototype and validate low-code AI agent workflows for HR query automation before development handoff.

Key Achievements

- Built reusable automation frameworks from scratch, improving overall team productivity by 50%.
- Migrated and validated 60+ SharePoint portals with zero production defects.
- Sustained 95% automation coverage across enterprise applications through AI-assisted test maintenance.
- Cut test-documentation effort by 40% through Gen AI adoption for test cases and RTMs.

Education

Bachelor of Engineering (B.E.) — Rajiv Gandhi Technical University (RGTU), Bhopal, M.P., India
